

THE POLLINATORS

POLLINATORS ARE AN IMPORTANT PART OF AN ABUNDANT PRODUCTIVE GARDEN. BEES, BUTTERFLIES AND HUMMINGBIRDS CARRY POLLEN FROM ONE PLANT TO THE NEXT HELPING TO PRODUCE A FERTILE SEED OR FRUIT. 80 % OF THE WORLD'S CROP SPECIES AND NATIVE PLANTS RELY ON POLLINATORS. MOST OF OUR VITAMINS AND MINERALS COME FROM POLLINATED PLANTS.

BIOLOGISTS FEAR BUTTERFLIES AND BEES HAVE DISAPPEARED FROM THEIR RANGES BECUAS OF HABITAT LOSS, INTRODUCED DISEASES. POLLUTION AND PESTICIDES. HERE ARE SOME WAYS YOU CAN HELP:

- **CREATE POLLINATOR FRIENDLY GARDENS TO HELP THEM THRIVE**
- **DO NOT USE ANY HERBICIDES AND/OR PESTICIDES**
- **GROW NATIVE PLANTS IN YOUR GARDEN**
- **ENCOURAGE RESIDENTS, LOCAL NURSERIES AND CITY GARDENERS TO PLANT A WIDER DIVERSITY OF FLOWERING PLANT SPECIES**
